

EDUARDO SCHMEGEL

Analytics Engineer — Power BI · Power Automate · AI Agents (Production) · LATAM Scope · IELTS 8.0

Porto Alegre, RS, Brazil | eschmegel@hotmail.com | linkedin.com/in/eduardoschmegel | github.com/Eduschm | eduschm.github.io/Portfolio

PROFESSIONAL SUMMARY

Bilingual Analytics Engineer (IELTS 8.0) with 4+ years at Dell Technologies, delivering production-grade BI, automation, and AI solutions at LATAM scale (Brazil, Mexico, Argentina). Designed and deployed a portfolio of 10+ enterprise AI agents on Glean, in daily use by sales and finance teams — one agent alone runs 500+ executions/month, saving 5 minutes per use (~42 hours/month recovered from a single workflow). Cumulative impact: 1,500+ hours/year saved across automation, RPA, and reporting. Currently pursuing a Lato Sensu post-graduate degree in AI & Big Data at ICMC/USP.

TECHNICAL SKILLS

BI & Analytics: Power BI, DAX, KPIs, Salesforce, Multi-page Reporting

Automation & RPA: Power Automate, Power Automate Desktop, RPA, Workflow Automation

AI & LLMs: Glean, AI Agents, Prompt Engineering, LLMs in Production

Languages & Data: Python, SQL, ETL, pandas, NumPy

DevOps: Git, GitHub Actions, CI/CD, CLI, Makefile

Machine Learning (personal projects): scikit-learn, XGBoost, LightGBM, CatBoost

PROFESSIONAL EXPERIENCE

Analytics Engineer — LATAM Finance COE

Dell Technologies | Porto Alegre, Brazil (Remote) | July 2024 - Present

- **AI Agents Portfolio (BR/MX/AR):** Designed and deployed 10+ enterprise AI agents on Glean serving sales and finance teams across Brazil, Mexico, and Argentina, including the flagship AI BID Analyzer (government RFP analysis with local legislation adaptation, mapping non-standard requirements vs Dell's standard proposal, flagging legal and commercial risks). One agent alone runs 500+ executions/month at 5 minutes saved per use — approximately 42 hours of manual work recovered monthly. All agents in daily production use, not prototypes.
- **Partner Compensation Dashboard:** Power BI + Power Automate solution identifying CRM orders with unlinked partners (previously causing missed commissions). Cut report generation by 3-4 hours per week and improved partner traceability across the channel program.
- **LATAM Finance Reporting:** Multi-page Power BI dashboards centralizing finance backlog and KPIs for regional stakeholders; Salesforce integration via Python ETL pipelines.
- **Automation and RPA:** Power Automate flows and RPA robots (Power Automate Desktop) for cross-database lookups, document extraction and spreadsheet processing — 100+ hours/year saved, reduced manual errors.
- **Cumulative Impact:** 1,500+ hours/year saved across automations and reporting; cross-functional work with finance, sales and analytics teams.

Sales Operations Analyst — High & Key Accounts

Dell Technologies | Porto Alegre, Brazil | June 2022 - July 2024

- Built Power BI dashboards integrated with Salesforce and Python ETL; automated reporting and improved pipeline visibility for enterprise accounts.
- Owned operational reporting for High and Key Account segments (enterprise clients with multi-million dollar pipelines), supporting account prioritization and forecasting decisions.

Sales Intern — Key Accounts

Dell Technologies | Porto Alegre, Brazil | October 2021 - June 2022

- Supported Key Accounts team with product quotations and proposal submissions; promoted to full-time Sales Operations Analyst within 9 months.

EDUCATION

Lato Sensu Post-graduate — AI & Big Data

ICMC, Universidade de São Paulo (USP) | 2026-2027 | In Progress

Bachelor of Science in Economics

Universidade Federal do Rio Grande do Sul (UFRGS) | 2020-2024 | GPA 8.3 / 10

CERTIFICATIONS

- **IELTS Academic 8.0** — Cambridge Assessment
- **Data Scientist Associate** — DataCamp (2025)
- **CS50P — Introduction to Programming with Python** — HarvardX

LANGUAGES

- **English** — IELTS 8.0 / C1 (Bilingual)
- **Portuguese** — Native

PERSONAL DATA SCIENCE PROJECTS

End-to-end machine learning pipelines with CI/CD, ensemble modeling, and reproducible workflows — building broader data science capability alongside production BI/automation work at Dell. Full code and documentation: github.com/Eduschm

- **Telco Churn Prediction:** Voting ensemble (XGBoost + LightGBM + Decision Tree) with SMOTE, threshold tuned for $FPR \leq 10\%$. ROC-AUC 84.1%, Recall 75.7%. Modular CLI, joblib serialization, GitHub Actions for CI/CD.
- **Banking Fraud Detection:** Recall-optimized classification pipeline (Logistic Regression, Random Forest, XGBoost via RandomizedSearchCV), modular CLI, joblib serialization.
- **House Prices (Kaggle):** Stacking ensemble (XGBoost + LightGBM + CatBoost base learners + ElasticNet meta-learner), KNN imputation, RMSE ≈ 0.22 .

KEYWORDS

Power BI, DAX, Power Automate, Power Automate Desktop, RPA, SQL, Python, ETL, Salesforce, AI Agents, Prompt Engineering, Glean, LLMs, Large Language Models, Business Intelligence, Data Analytics, Analytics Engineering, Power Platform, Workflow Automation, Multi-page Dashboards, KPI Reporting, LATAM Reporting, Bilingual English/Portuguese, IELTS 8.0, scikit-learn, XGBoost, LightGBM, CatBoost, Machine Learning, GitHub Actions, CI/CD.
